PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience in React.js, Node.js, Java, and Firebase, and a track record of shipping production-ready applications. Built a real-time video conferencing platform using WebRTC and Gemini AI, a responsive food delivery app, and a Java-based game — all publicly deployed. Comfortable across the MERN stack, Docker, CI/CD pipelines, and Azure cloud. Currently deepening expertise in TypeScript and Spring Boot. Seeking a Software Developer role to build scalable, user-facing products from day one.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), TypeScript (basic), C++, HTML5, CSS3, SQL
Frontend: React.js, Redux Toolkit, Angular, Vite, Responsive Design, UI/UX Design Principles
Backend: Node.js, Express.js, Spring Boot (learning), ASP.NET Core, REST APIs, Microservices
Databases: MongoDB, MySQL, Firebase Realtime DB, JDBC, SQL Optimization
Cloud & DevOps: Microsoft Azure, Firebase, Docker, CI/CD Pipelines, GitHub Actions (basic)
Tools & Platforms: Git, GitHub, VS Code, IntelliJ IDEA, Power BI, Jupyter Notebook, Postman
Specialized: WebRTC Protocol, Real-Time Communication, Gemini API Integration, Unit Testing

WORK EXPERIENCE

Full Stack Development Intern · ANUDIP Foundation 3 Months, 2024

- Developed responsive web applications using React.js and Node.js, implementing modern UI/UX design patterns that improved user engagement across cross-functional team deliverables.
- Built and integrated RESTful APIs with MongoDB and Firebase backends; maintained code quality via Git version control and collaborative pull-request reviews.
- Participated in debugging sessions that resolved critical performance bottlenecks, reducing average page load time by an estimated 30%.
- Collaborated directly with design and product teams to translate wireframes into fully functional, pixel-accurate components.

Java Full Stack Development Trainee · QSpiders Jul – Sep 2025

- Mastered OOP design patterns, SOLID principles, and DBMS fundamentals, applying them to enterprise-grade Java projects.
- Built microservices architecture with Spring Boot; developed scalable REST APIs consumed by front-end React components.
- Implemented advanced SQL optimization and JDBC techniques for high-performance enterprise database operations.
- Participated in collaborative team sprints focused on code quality, peer review, and Agile best practices.

PROJECTS

OptiConnect — Real-Time Video Conferencing Platform | Java, WebRTC, Firebase, Docker, Gemini API 2024–2025

- Architected and deployed an enterprise-grade video conferencing app supporting real-time audio/video streaming with low-latency WebRTC communication for up to 50 concurrent users.
- Integrated Google Gemini API for automated meeting transcription and AI-powered summarization, reducing post-meeting note-taking effort by 80%.
- Designed and implemented screen sharing, instant messaging, and user authentication modules; containerized the full stack using Docker for reliable cloud deployment.
- Optimized Firebase Realtime Database schema for scalable session management, reducing read latency by 40%.
- 🐙 github.com/ranjeetsingh/opticonnect

- Designed and developed a fully responsive food delivery platform with real-time order tracking, delivery status management, and mobile-first responsive layout across all screen sizes.
- Implemented performance optimizations that achieved sub-2-second load times on both mobile and desktop browsers.
- Deployed on a web hosting platform with a CI workflow for automated build and deploy on push.
- github.com/ranjeetsingh/eat-master

Warrior-G — Turn-Based Adventure Game | Java, OOP, Data Structures

2024

- Built a console-based interactive RPG using Java, applying OOP design patterns (Strategy, Factory) for modular, maintainable game architecture.
- Implemented AI enemy behavior system, turn-based combat engine, and collision detection using optimized data structures (priority queues, hash maps).
- github.com/ranjeetsingh/warrior-g

EDUCATION

Bachelor of Technology — Computer Science Engineering

2021 – 2025

Raj Kumar Goel Institute of Technology, Ghaziabad (AKTU)

GPA: 7.0 / 10

- Relevant Coursework: Data Structures & Algorithms, Web Technologies, DBMS, Software Engineering, Cloud Computing.
- Active in competitive programming contests with focus on algorithm optimization and problem-solving.

Intermediate in Science (PCM)

2020 – 2021

Kendriya Vidyalaya, Jhansi

85%

CERTIFICATIONS

- **Java Programming** — Advanced OOP & Design Patterns
- **Full-Stack Web Development Specialization** — React, Node.js, MongoDB, Firebase
- **Azure Cloud Computing Fundamentals** — Cloud Infrastructure & Services
- **Data Analytics Professional** — Excel, SQL, Power BI

LEADERSHIP & COMMUNITY

- **Technical Lead, Developer Community Club** — Organized 5+ coding workshops, hackathons, and competitive programming events for 100+ students.
- **Mentor, Developer Community** — Provided technical mentorship to 10+ junior developers in full-stack web development and Java.
- **Member, ACM (Association for Computing Machinery)** — Active in technical events, speaker sessions, and industry networking.
- **Open-Source Contributor** — Actively engaged with the GitHub community; contributed improvements to multiple public repositories.
